

# P2D Platform Release Notes Sprint 32

If your PC has not been restarted after the software has been deployed, please ensure you do this or refresh your browser.

The following updates have been included in the upcoming release to the P2D platform:

## New Default Field Values When Uploading Finished Product Template

When uploading the product template, the three new fields for the trade route and supply chain will now default to finished product status. As the template only applies to the upload of finished products, any Raw Material products will still need to be added manually.
