

P2D Platform Release Notes Sprint 37

Please ensure you refresh your browser after the software has been deployed to view all updated features. If the updates are not visible, we recommend restarting your computer.

The following updates have been included in the upcoming release to the P2D platform:

Incomplete notification will be more specific

The incomplete trace notification email will now specify the information missing on the trace with a link to the specific area. The email will also indicate the name of the account that instigated the notification rather than their P2D account code and mention the account that owns the affected trace, so that users who operate multiple sites know which account to inspect. All missing properties will be highlighted in the email informing the user of the information they need to provide.

Hello there,

Your partner "MAZE-MARLOW(MAZE0002)" would like to notify you that below trace(s) are incomplete. Please complete the trace(s) as soon as possible, in order to prevent any delays.

M&S UPC	Batch ID	Product Description	Missing Information	Supplier Name	Link
TestComp	220529	Test Composite meat	Manufacturing Plant Name, Nature of Commodity, Documents Not Attached	MAZE-MARLOW	View
TestComp	220228	Test Composite meat	Manufacturing Plant Name, Nature of Commodity, Documents Not Attached	MAZE-MARLOW	View

Please do not respond to this email. If you have any questions, reach out to your account manager or contact support@p2dl.com.

Thanks,
P2D

Update to the product data template

On the template we have enabled users to add Raw Material EHC types and GEFS EHC types to the Excel template. These are split up by tabs along the bottom of the document (see image below). We have restructured the order in which the data is completed to make it more logical. As soon as you select the EHC type, the relevant fields will be highlighted in yellow.

23									
24									
25									
26									
27									
28									
	Documentation	Finished Product Data	GEFS Raw Materials Product Data	Raw Materials Product Data	Constants				

- ◆ The Excel **upload** will work in the same way as the existing functionality, except that we now cater to more EHC types. Users are still able to upload the old template if they have not merged to the new one.
- ◆ The existing product list **download** works in the same way as the existing functionality, except that we now pre-populate the different tabs (GEFS, Raw Materials, and Finished Product tabs) with the different products.

Verification before trace data is submitted

We have added a small red indicator next to each field to mark that it is incomplete. Fields will remain red until data is entered. A warning message will appear when you save the trace if any fields have not been completed.

TRACE - Dairy Products PT RM

<p>M&S UPC *</p> <input type="text" value="00000041"/>	<p>Description of Commodity</p> <input type="text" value="Dairy Products PT RM"/>
<p>Batch Identifier (Best Before Date/Julian Code) *</p> <input style="border-left: 2px solid red;" type="text"/>	<p>Country of Origin</p> <input type="text" value="GB"/>
<p>Region of Origin</p> <input style="border-left: 2px solid red;" type="text"/>	<p>Latin Species Scientific Name of Animal</p> <input type="text" value="Bos taurus"/> <input type="checkbox"/> Other
<p>Dairy Earliest Production Date</p> <input style="border-left: 2px solid red;" type="text" value="dd/mm/yyyy"/> <input type="checkbox"/> N/A	<p>Dairy Latest Production Date</p> <input style="border-left: 2px solid red;" type="text" value="dd/mm/yyyy"/> <input type="checkbox"/> N/A

The pop-up warning will read as follows:

- ◆ IF MISSING DATA ONLY: “This trace has incomplete form fields. Do you wish to continue?”

Missing Data

This trace has incomplete form fields. Do you wish to continue?

- ◆ IF MISSING DOCUMENT ONLY: “This batch may require a declaration, however one has not been uploaded. Do you wish to continue?”

Document Upload

This batch may require a declaration, however one has not been uploaded. Do you wish to continue?

- ◆ IF MISSING BOTH: “This trace has incomplete form fields and may require a declaration, however one has not been uploaded. Do you wish to continue?”

Missing Data

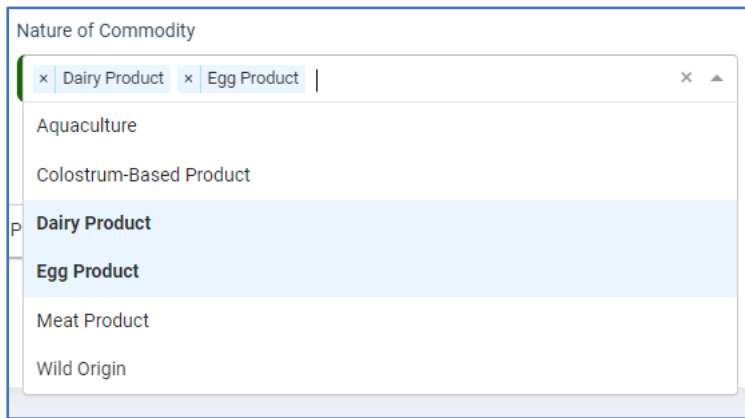

This trace has incomplete form fields and may require a declaration, however one has not been uploaded. Do you wish to continue?

Dropdown List for Composite Comp and Composite Attestation Nature of Commodity

We have simplified the Nature of Commodity fields by creating a dropdown list for Composite Comp and Composite Attestation. These would then pull through onto the schedule as a comma separated list. This is a multi-select dropdown list.

Composite Comp:

- ◆ Meat Product
- ◆ Dairy Product
- ◆ Colostrum-Based Product
- ◆ Aquaculture
- ◆ Wild Origin
- ◆ Egg Product

Composite Attestation:

- ◆ Dairy Product
- ◆ Colostrum-Based Product
- ◆ Aquaculture
- ◆ Wild Origin
- ◆ Egg Product
