

# P2D Platform Release Notes Sprint 31

If your PC has not been restarted after the software has been deployed, please ensure you do this or refresh your browser.

The following updates have been included in the upcoming release to the P2D platform:

## Abattoir Numbers from Raw Materials

When creating a Trace for a Meat Product or Meat Preparation you will notice that the fields asking for the abattoir details have been removed. This information will now pull through (to schedules) from the Raw Material entry that will be linked to the finished product.

Previous Trace fields can be seen in the below example:

TRACE - Meat Products NT	
Unique Product Code (UPC) *	Description of Commodity
00000017	Meat Products NT
Batch Identifier (Best Before Date/Julian Code) *	Commodity Code (CN) *
	000000016
Temperature of Products	Nature of Commodity
Chilled	
Manufacturing Plant Name	Manufacturing Plant Establishment Number (Approved Premises Number)
P2DL	GB1250
Abattoir Plant Name *	Abattoir Approval Number of Establishment *
P2DL	GB1250
Cold Store Approval Number *	Units per Tray *
N/A	12

Gross Weight (kg) per Pack *	Net Weight (kg) per Pack *
0.35	0.33
Country of Origin	Region of Origin
x GB	
Region of Origin II.1.1	Zone of Origin
Latin Species Scientific Name of Animal*	Species 3 Letter Code*
x Sus scrofa <input type="checkbox"/> Other	x POR

### Simplified EHCs - Raw Materials (GB to EU)

If Users create a product that is marked as Raw Material, trade route is GB to EU and the product is not a “GEFS Raw Material”, the new simplified EHC types should be applicable to the product. The fields deemed unnecessary for an EHC, if it is being used as a Raw Material, have been removed.

Add Products x

---

Is your product a raw material or finished product?*	Select supply chains that this product is part of*
Raw Material (not for export)	M&S
Select trade route for this product*	
GB - EU	
<input type="checkbox"/> GEFS raw material	

Once you have selected your product to be a Raw Material, you will notice that the EHCs simply have RM at the end of the description as an indicator. When you have chosen which Raw Material applies to your product, you will see a greatly reduced field list as seen in the below images.

Fields will of course vary by EHC Type.

These products, as with the GEFs Simplified EHCs, will require a manual set up from the start. You will be unable to switch over the EHC types in any existing Raw Material products.

If you need any further guidance please do not hesitate to contact your Account Manager.
