Legislative Change - Gelatine EHC trace type fields amended

All relevant government bodies have agreed new rules on “Compound Products” (Dual/Multi EHCs), which means that a composite EHC cannot be used for “Compound Products”. This means that the following amendments have been made to Gelatine traces in order to satisfy the new legislative requirements.

◆ Identification Mark – Has been added

Validation - No validation required (free text box)

◆ Production Dates – Has been added

Validation - Date Range (to and from - similar to current trace fields)

◆ Latin Species Name – Has been updated to use a dropdown list rather than free text

Validation - Exact same dropdown values and ‘other’ option as seen in Meat Products NT (see image below)
