

# P2D Platform Release Notes Sprint 52

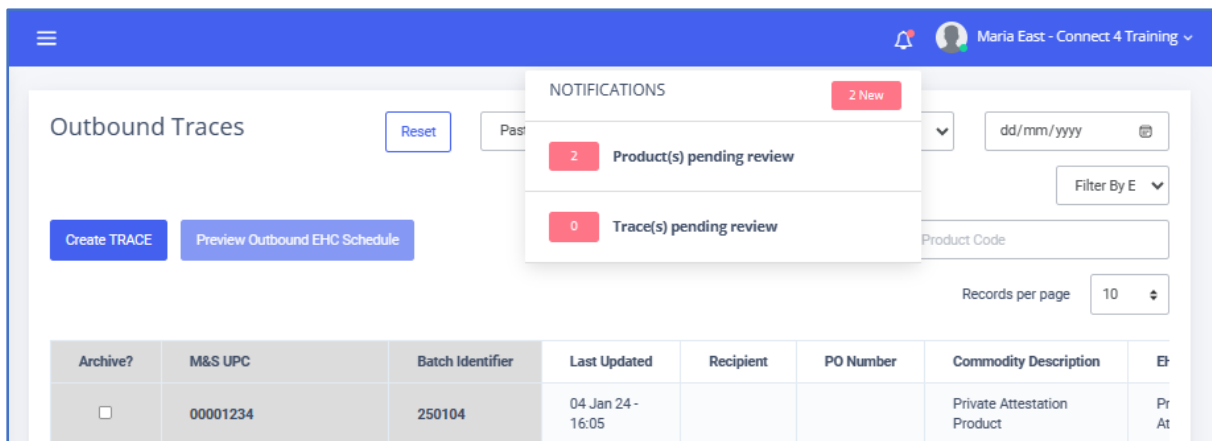

## (Connect 4 Sprint 4.2)

**If your PC has not been restarted after the software has been deployed, please ensure you do this or refresh your browser.**

As we prepare for upcoming changes and as new functionality and updates progress, please be assured, that you will be actively advised on how these will impact you. If you wish to hear more about these exciting changes, please don't hesitate to reach out, we'd be happy to talk you through it further.

## Supplier Notification Counter (Traces)

In order for Suppliers to know they have an actionable trace, there is now a Trace notification counter. When you click the counter or text, it will take you to the "Outbound Traces" tab.

## Audit Log for Traces

Each trace will have an Audit Log that records the actions against it. It will record the date, time, user, user role and any relevant comments if required.

Events recorded include:

- ◆ Trace Creation
- ◆ Trace Hypercare Approve
- ◆ Trace OV Approve
- ◆ Trace Hypercare Reject
- ◆ Trace OV Reject (or Withhold)
- ◆ Trace fields edited
- ◆ Documents added/removed from a trace
- ◆ Recipients added/removed from a trace

The location for the audit log will be at the bottom of both the preview and the edit of the Trace. The audit log timing style is in a 24-hour format.

The screenshot shows the physical2digital interface with a sidebar on the left containing navigation options: Dashboard, Shipments, Account Info, Users, Archived Traces, Outbound Traces (selected), Inbound Traces, Products, and GEFS. The main content area displays details for two traces: GB1234 and GB5678. Below this, there is a section for 'UPLOADED FILES' with a table listing a file named 'Private attestation declaration.docx' (23.026 kb) with a 'Download' button. A 'DATA COMPLIANCE CHECK HISTORY' section is also visible. The 'AUDIT LOG' section is highlighted with a red border and contains the following table:
